about us

Rontini e Boni is a leading company in the manufacturing of iron, steel and aluminium. From sleek doors, shutters and lofts to hoops and high energy-efficient aluminium-wood window fixtures, the company has a product to suit every residential application. We are also specialized in curtain walls installations, gates, bespoke interior projects as well as metalworks and wrought iron realizations.

The company, founded in 1968 as a craftsmanship business, has kept distinctive characteristics such as operational flexibility, suitable maintenance service, unvaried research for planning solutions and production capacity. Thanks to all these competence, the company is able to meet all customers' needs in terms of quality, continuous innovation, materials used and high technology machines.

personalizing

the mission

The last fifty years have seen a rapid and consistent growth of the company which has evolved from a craftsmanship reality to a worldwide business. Despite everything, our mission is to be a point of reference for existing and future clients in providing the best design solutions increasingly aligned to trustworthy professionalism, acquired knowledge, reliability and appropriate skills. By offering

the same principles, we always give clients definitive answers to their questions, personalizing their ideas and desires. We wish to help people realizing their own personal projects. This is our mission.

Energy renovation of buildings

Thanks to its versatility, heat resistance and high strength, aluminium is undoubtedly one of the most functional used metal around the world. Rontini e Boni aluminium window fixtures have all the visual, durability and low maintenance qualities of the aluminum and combine innovative and construction advantages with advanced features such as heat/acoustic insulation, water-tightness, resistance to air and indeformability. Our doors

and windows encompass exciting aesthetic lines, high levels of security and practicality. Surfaces can be colored and characterized by wonderful metallic effects. Architectural adaptability, contemporary taste and energy efficiency of buildings are additional features that make the difference.

The materials we normally use for the production of curtain walls and doors and windows are: METRA, SCHÜCO, GEAL and PONZIO.

aluminium

contemporary taste

To improve the architectural features of administrative and industrial buildings as well as public and private dwellings. This is another company goal. A wide range of design solutions motivate us to pursue the development of curtain walls systems

long-lasting quality

Timber quality and aluminium resistance. This is the Aluminium-wood system. A perfect combination which enables us to use aluminium for the exterior part while covering the interior part with a thick layer of solid wood. Aluminium frames

are exceptionally resistant to corrosion, a remarkable aspect that guarantees an extended lifespan. On the other hand, wood – with its natural colours – keeps the living space comfortably warm.

customizable

aluminium INTERIOR DOORS

Interior doors undoubtedly add value to your house. Rontini e Boni doors are elegant, solid and reliable. Each door – made from aluminium – is totally customizable, allowing our company to meet any customers' needs.

ADDING

HOUSE

VALUE

TO YOUR

SHUTTERS

Aluminium is a durable, lightweight and high-strength metal. Thanks to all these excellent properties is now the second most widely used metal in the world. Relying on this, Rontini e Boni can realize any sort of sizes for your shutters, boasting the best thermal performances and low maintenance features.

MOSQUITO NETS

A mosquito net offers protection against mosquitos, flies and insects. Rontini e Boni mosquito nets are specifically designed and tested to favour house brightness and ventilation. We have various styles of bespoke mosquito nets to better fulfill customers' specifications in a positive manner.

FRONT DOORS

We supply a wide range of aluminium front entrance doors; find your perfect bespoke option. Rontini e Boni entrance doors offer the highest levels of security, thermal performance and durability.

manufacturing operations

IRON

The manufacture of iron is one of the oldest professions in the world and it definitely requires great knowledge and experience. It makes the production of doors and windows possible as well as lofts, railings, gates, shop fittings

and metal works fabrications. We also design and make bespoke handrails, tables and bookcases. For the production of window fixtures we normally use materials as follows: SECCO SISTEMI, JANSEN, FOSTER.

FURNITURE SET UP

iron

The art of wrought iron – born of fire and humans hand – enables us to fulfill any precise project. Our products are equally at home in domestic and commercial environments – both inside and out – and are used in home furnishings, patio furnitures (e.g. Gazebos and Verandas) and handiworks (e.g. Tables and bookcases).
